

Home Work Open Source/freeware software.

All the software you provide for the below problems must be open source and/or freeware. Not free for 30 days or a free trial. Note: RedHat is neither open source nor free. Actually, most of the software you should be listing is freeware.

Do not be lazy, do a little research make sure your listed software is current not discontinued, truly free and popular! Popular is not well defined, but does it appear some people use the product. Do not give me several versions (editions) of same product.

1. What is the distinction between open source software and freeware software?
2. List 10 different version of Linux.
3. List 10 different web browsers and specify the OS they work with.
4. List 2 different open source and/or free Office type suites.
5. Find a freeware alternative to Adobe Acrobat Reader. That is a pdf reader.
6. List 3 different freeware antivirus programs.
7. List 3 different freeware anti-malware programs.
8. Who is Larry Ellison? What is his computer work claim to fame?
9. Who is Tim Berners-Lee? His creation literally changed the world you/we live in.
